Equilibrium multiplicity and asymmetry
pure NE ($n \leq 5$) / # tail clusters
median Gini($\varepsilon_1, \ldots, \varepsilon_n$)
NE / clusters (symmetric)
NE / clusters (heterogeneous)
number of players n
Modal-cluster minority vs. majority A
MIA advantage at modal cluster
$A_{\min}$ (symmetric)
$A_{\max}$ (symmetric)
$A_{\min}$ (heterogeneous)
$A_{\max}$ (heterogeneous)
number of players n
